

ACTIVATED CARBON FILTRATION

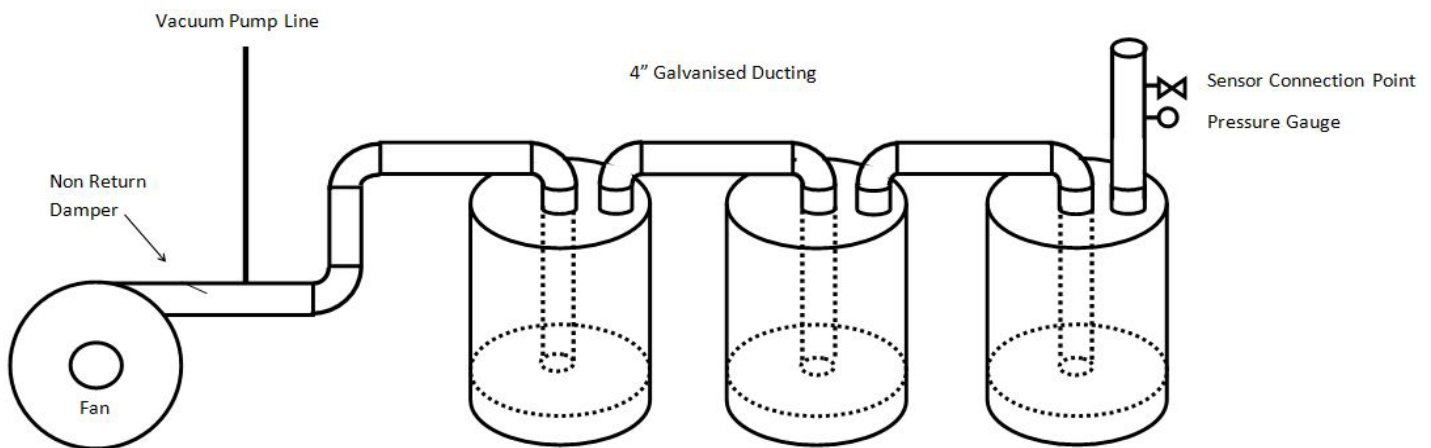

ACTIVATED CARBON
TECHNOLOGIES PTY LTD

International Chemicals Engineering (I.C.E) offer a range of Activated Carbon Filtration Systems specifically designed for the Gas Odorant Sector. Our range of Custom built activated carbon filtration systems are specifically designed with safety & the environment in mind; minimising odour discharge rom gas odorant discharges

Our range of Filtration systems provide site operators the ability to handle gas odorants without odour discharges to the local environment

I.C.E. offer a range of activated carbon filtration systems:

- Large 200L canister utilising customised design & leading activated carbon technology to ensure airflow is filtered effectively
- Small 20L canister utilising customised design & leading activated carbon technology to ensure airflow is filtered effectively
- Customised systems including an array of 200L canisters, ventilation ducting & fan

All activated carbon filtration systems are built using carbon from 'Activated Carbon Technologies'. Stock on Hand & available for immediate dispatch.

For further product specifications or enquiries, please contact us at info@iceng.net.au or 03 9792 4844.
