Dear Neil,

We would like to express our satisfaction with the Ecosorb 206, Skid Mounted Odour Neutralising System that you supplied for our factory in Glenfield.

As you know we had been experiencing some difficulties with complaints from the neighbours due to styrene odour emissions from our fibreglass workshop. The complaints had been reported to the Auckland Regional Council and we had to find a solution to the problem.

Following your initial visit to our premises where you demonstrated the effectiveness of Ecosorb 206 in neutralising and not just masking styrene odours, we were suitably impressed and confirmed our order for a Skid Mounted Odour Neutralising System that was to be designed and incorporated into our existing dust extraction system.

The Skid Mounted Odour Neutralising System with its six atomising nozzles was fitted in October 2008 and we have been delighted with the results. The system is run whenever we are spraying in the workshop and the odours are reduced to a minimum within the workshop. Externally the odour problem has been eliminated and we have had no more complaints from the neighbours.

With Kind Regards,

John Young
